OBSERVATIONS E-W oriented feature covered by 1016. Anthropic deposition containing roof tiles, mortar, pottery, and a few small bones. Found 3 nails on S side (2 large and 1 may be a hobnail from a sandal). (Excavated with hrowels on a dry & sunny day.)							
DESCRIPTION Position within sector: 1m from current S border. Shape: rectangular feature oriented E-W and rounded edges on E side, only. W side has squared corners. (89 x 210 cm ±)

INTERPRETATION

Fill of a grave. Tiles are tegulae forming a cappucino-style tomb covering. Nails may indicate presence of wooden covering in the past. Smallest nail possibly a hobnail from a sandal; also located on W end near where we believe the feet are located and part of what may be the skull visible from under Eastern-most tiles.
