Description: *Two carved tufo slabs that form the top of a well. Found in the middle of Room 2 against the northern wall. At the same level of the floor 1173. A large piece of tile and pottery were found stuck to the surface. A large cap stone was found over the well.*

Sketch (if applicable, indicate North)

**INTERPRETATION**

*The two tufo slabs that mark the top of a well give Room 2 the appearance of possibly being a courtyard. For some reason the well was capped. At a later date the right slab was partially cut into by a grave cut. Although they are carved tufo, there appears to be some sort of white-wash that was applied to the top.*
