DESCRIPTION

Position within sector: *near southern excavation limit centrally positioned E-W in Area B*

Shape: *within cut 1347 under fill 1342*

two rectangular shaped tegulae at E and W end of cappuccia 1343, on the W end an imbrex, long curved piece is adjacent to the tegulae to the north

Description:

serve as the cap over the top and bottom of the lead cappuccina on the outside, sealing off the structure. Are placed on their sides and are nearly fully in tact.

Sketch (if applicable, indicate North)

INTERPRETATION

a protective closing for the East and West ends of cappuccina SU 1343, inside cut 1347, function like capstones of a typical cappuccina except over a lead one.

** The easternmost tile (head end of cappuccina) was cut like a stele.*

We took several pictures of the situation as the hair pin and the tile were still in situ.
