Description: Small wall of irregular tufo stones, some worked on (only) one side to present a flatter facade. Excavation in the room to west revealed at least 2 "courses" of stones. One stone appears to sit on top of wall 1390 to the south. See photo model 322 for details of individual stones.

INTERPRETATION

SU 1450 is a small wall just to the east of the entrance to the house in area B. It covers wall 1350 + therefore represents one of the more recent phases. It appears to match, in construction technique + rough alignment, wall SU 1453 to the north. The two are separated by a gap of ca. 90cm, which may represent the threshold of the entrance to room 6. However, the orientation of wall 1453 appears slightly off in relation to 1450.
