INTERPRETATION

1 large rock 96 cent. in diameter and 96 cent deep. The mendith rests on top of the bedrock. There are 4 protrusions. Two opposite each other at a depth of 38 cent. Two more at a depth of 48 cent also opposite each other. One of these is quite a bit smaller than the other 3 and appears to have broken off. The top part of the rock is smooth on the inside and outside for only a few cent. The on the inside & outside the marks of the carving tools are visible.
