INTERPRETATION

5U2021
 The monolithTH sits directly on top + the gap between the bedrock + the monolith is filled in w/mortar. The depth of the cut is not yet known. There are remnants of mortar lining the cut on the Southern edge. On the North Eastern limit and the South Western there are footholds. On the SW limit the foothold is 22 cent below the top of the cut + the second hold is 52 cent below the top of the cut. On the NE edge the foothold is 39 cent below the top of the cut. The diameter of the cut is 102 cent.
