INTERPRETATION

Rectangular cut through opus signinum surface (2201) in room of 2nd c. BCE "house". Truncated on S by drainage channel 2206 - line of cut seems to continue S of drainage channel (cut 2212). No sides or bottom of cut visible in section created by drainage channel, so the visible part of cut 2211 is either the bottom of the cut, which stopped just after the opus signinum surface 2201, or (less likely) the cut extends below the level of 2201 + its fill cannot be differentiated from surrounding layers.
