**INTERPRETATION**

Oval pit, function unknown trench (2238). Extremely dense inclusions, including frequent rubble and significant fragments of multiple amphorae. The size, density, and quantity of artifacts indicates intentional backfill, not simply accumulation. It is possible that the rubble and plaster inclusions represent debris from the destruction of Room 5's walls + ledges (i.e. 2231, 2232, and or 2233). Fill not completely excavated; eastern portion of bottom still contains rubble. Sides of cut at risk of collapsing — Spot dating places deposit on 4<sup>th</sup> AD. This makes it extremely unlikely that deposit is connected with destruction of Room 5
