Description:

The tuff wall is made up of 6 irregularly shaped blocks. The two blocks towards the west end are the most complete and the strongest rectangular shap. The two blocks in the mid-section of the wall are severely truncated; the western block having missing chunk on both sides, the eastern block being severely truncated and stilt with a right corner missing in a rough 90° angle. The last two tuff blocks on the

Sketch (if applicable, indicate North)

eastern side of the wall are also severely truncated. The western of the two having its highest points on opposite diagonal corners. The last block seems to be shorter in length than the 5 other blocks. There are major crevices in this block and has a fairly short height

→ Foundation of an east west bound to north-south wall 2245. Wall associated with Coccio pesto floor 2253. Forms a corner with SU 2245, possibly the corner of a room. TOGETHER WITH WALL 2240 TO THE SOUTH, THIS WALL DELIMITS THE SPACE OF THE ENTRWAY OF THE HOUSE OFF OF THE ROAD TO THE EAST.
