Description: Wall of mostly large basalt blocks, very irregular because of robbing. At undisturbed parts it is well higher than surrounding floor, but most of it is disturbed and lower than floor level. Northern limit is floor 2253 to west, but unclear to east (2243). It touches a tufo block to the west (2256). Southern limit is also unclear.

Sketch (if applicable, indicate North)

**INTERPRETATION**

This wall along with 2239 delimited a space that may have been an entryway. The room has a floor, but it has been cut and only covers half the area to the North. This also supported by the road to the east. To the west it is bound to wall 2256, which seems to extend this space to the South or possibly begin a new one (atrium?). The wall appears to be earlier than the connecting N-S wall 2256, because it is disturbed on the western edge possibly by the placing in of 2256. It also appears to be leftover from an earlier wall system since the other walls 2256 and those to the North of the entryway are Tufo and have larger blocks, but for some reason this basalt wall was just left in and re-used. No cut was recorded because the wall is being left in.
