Description:

Wall foundation comprised of 4 large blocks and the remains of one block at the northmost end which suggests the wall is truncated. The first block on the south is a corner block and roughly square shaped it is also the smoothest of the 4. The next 3 blocks are more roughly hewn and rectangular. The 3rd block to the north is the longest and shows damage in the form of a furrow in the northern half. The last remaining piece of the wall is small and damaged and no longer level with the rest of the foundation.

Sketch (if applicable, indicate North)

INTERPRETATION

- wall foundation which perhaps delimits the eastmost side of the "atrium". Definitely associated with ^{and its steps} coccio pesto floor 2253.
- similar in alignment, orientation and construction to wall 2256
- forms corner with wall 2239
