INTERPRETATION

SU 2231 is cut by this SU, 2247. There was a fill with rubble in it and when removed there was a negative feature resembling a robbing cut. This cut is in place of where a wall dividing two rooms should be. It looks like the wall should take a turn and make a 90° turn to the S along the E edge of Room 5 (SU.2230) but a continuation of a robbing cut here could not be determined.
