Description:

short, seemingly truncated wall going E-W. Joins with 2276 to E, while the westernmost stone seems to ~~be~~ have been intentionally cut on the left side. ~~the~~ Floor patch comes up against the wall on the Northern side. Wall seems to dip down between the large western stone and the even larger one that forms the Northern end of 2276.

Sketch (if applicable, indicate North)

**INTERPRETATION**

This seems to be a section of a wall that marks the Southern boundary of the atrium and the Northern limit of a room which it forms in connection with N-S wall 2276. The western stone looks to have been intentionally cut, with a gap to the West of it and then another cut stone marking the Eastern end of 2260. The gap between these two appears to be a threshold between the atrium to the North and the room to the South. Due to the size of the Northern stone in 2276, the wall 2274 appears to have been put in after 2276, but possibly immediately after.
