INTERPRETATION

Began excavating SU in order to determine if either walls 2278 or 2256 continued or connected. We found no further evidence of wall stones. Furthermore, there was no clear indication of a robbing cut. Due to the different construction styles of wall 2256 (worked orange tufo blocks) and wall 2278 (irregular grey tufo stones), we conclude that robbing activity is unlikely. The two walls remain discrete SUs and did not appear to originally connect.
