INTERPRETATION

Cement-like patch of paving, similar to another patch of pavement (SU 2361) directly to the E, however with different inclusions. Determined that 2362 was cut on the N by the foundation activity for wall 2240, suggesting that the pavement predates wall 2240. However, this relationship remains rather unclear. 2362 does not physically touch wall 2256 to the W, however it may have also been disturbed on this side by foundation activity for wall 2256.

Not excavated in 2011.
