DESCRIPTION Position within sector: the layer is placed in the central part of the rectangular cut SU 334, in S/E part of Area A Shape: circular-irregular									
For layers complete this section: Surface (slope direction, visible inclusions): the tufo is irregular for the presence of many little flakes. the layer has a slope direction from E to W Observations about inclusions (Clusters? Deposition slope): big flakes of tufo distributed without connection in the layer Observations about thickness (Increases? Decreases?): constant thickness Nature of the interface with layer below: <input checked="" type="checkbox"/> sharp <input type="checkbox"/> diffuse <input type="checkbox"/> commingled <input type="checkbox"/> other (specify)
