OBSERVATIONS A spread of tufo and tile within the area of the house, beneath SU 444.					
DESCRIPTION					
Position within sector: Central part of area A, located within the house					
Shape: oblong/rectangular					
For layers complete this section:					
Surface (slope direction): visible inclusions: large clusters of stone (tufo) + tile. The tiles are spread out and not clustered, like the tufo pieces.					
Observations about inclusions (Clusters? Deposition slope) clusters of tufo throughout the SU.					
Observations about thickness (Increases? Decreases?):					
Nature of the interface with layer below: <input type="checkbox"/> sharp <input checked="" type="checkbox"/> diffuse <input type="checkbox"/> commingled <input type="checkbox"/> other (specify)					
For cuts complete this section:			Sketch for layers and/or cuts (indicate North):

INTERPRETATION

Even though there was a collection of tile and tufo, edges of a cut couldn't be distinguished therefore it's recorded as a layer and not a cut.
