Description:

bottom ashlar blocks, some with some fill + small rocks between them. Upper rocks are more crumbly tufa, smaller in size, with less square edges. Two possible drainage cuts that have been filled in later

Sketch (if applicable, indicate North)

INTERPRETATION

Two types of tufa are present. The grey tufa could be disintegrated ashlars. Some orange tufa ashlars have also been used. Wall is characterized by soil and small rocks between many stones used.
