INTERPRETATION

SU 5055 is the skeleton burial contained in grave 47. The burial is oriented with the skull pointing south with fingers & feet pointing north. The skeleton is positioned on its back with the head facing east (to the right). Preservation is good with the exception of the cranial vault & ribs, and the skeleton appears to have been laid out carefully at time of burial based on parallel orientation of arms & legs as well as positioning of head. Strong occipital protuberance & gonial angle, as well as blunt mental prominence suggest male individual. Maxillary & mandibular teeth show little wear.
