Description:

Block parallel to wall 5011; tufo is not remarkably smooth, it has chunks of what seems to be smaller pieces of tufo; in alignment with 5086

Sketch (if applicable, indicate North)

INTERPRETATION

It seems likely that <sup>the</sup> ~~block~~ <sup>block</sup> continued through where the robbers <sup>cut</sup> ~~at~~ 5086 is now. It also seems likely that this block is in relationship to the structure in general, since it is parallel to wall 5011. The top of the block seems smoother and appears to be <sup>at</sup> the original height. It seems that this block could have acted as a curb or porch stoop-like structure between levels of this building since it's on a slope. Further blocks are eastwards along the course of
