OBSERVATIONS																					
Area was partially excavated in 2012, which determined that numerous layers represented various dumps deposited in quick succession, all in the same period. The decision was therefore made to remove the remaining material as a single site. Special Finds: 923, 924, 926, 927, 928, 929, 930																					
DESCRIPTION																					
Position within sector: Eastern most wall in area F-NORTH																					
Shape: rectangular																					
For layers complete this section:																					
Surface (slope direction; visible inclusions): slopes irregularly from N to S																					
Observations about inclusions (Clusters? Deposition slope): Clusters of large rocks throughout																					
Observations about thickness (Increases? Decreases?): Deeper to the south

**INTERPRETATION**

SU 5171 represents the accumulation of rubble dumped steadily over a relatively short period of time, after all the basalt pavers had been robbed out of the road.
