Wall finishing Stucco Opus signinum Plaster Painted Plaster Other (specify)

Approx. length, width, height of structural remains:

Description:

The two blocks stands upon a small bench of soil and small stones.

Sketch (if applicable, indicate North)

INTERPRETATION

Wall probably connected to a later use of the F south area. The small portion of soil and stones on which the wall stands is similar to the technique used for the ~~block~~ block at the NW corner of F S-south (SU 5481); the absence of concrete and foundations suggests a function related more to an esthetic boundary rather than an actual function of retaining wall.
