Description:

Two tufo pavers that are part of a ramp both are smaller than other pavers, yet still have square shape, many indentation lines on western block. Very well preserved.

Sketch (if applicable, indicate North)

INTERPRETATION

Su 5462 represents two blocks which were pavers for access ramp that leads from the road in the south to the larger building to the north (area F). They are better preserved than some of their counterparts further north (Su 5321), perhaps because they were left fully exposed, as opposed to covered with a very thin layer of soil which encouraged plant growth & therefore root activity just above the stones.
