Description:

Mortared rubble wall, includes tufo, basalt, travertine, & ceramics. Sits on bedrock. Traces of cement visible on southern face at base of wall within channel. Adj. to ashlar wall 5417 + continues under concrete wall 5387.

Sketch (if applicable, indicate North)

SEE sketch SU 5519

INTERPRETATION

SU 5518 is the northern wall of a drainage channel associated also with similar walls 5519 + 5526. The channel thus created runs through 5417 + under 5387, & must have been built after the former & before the latter. The circular cut SU 5524 lies just north of this & may be a related water feature (it remains not fully excavated).
