Complete this section for foundations Faced foundation Wooden shuttering No shuttering

floor/revetment type

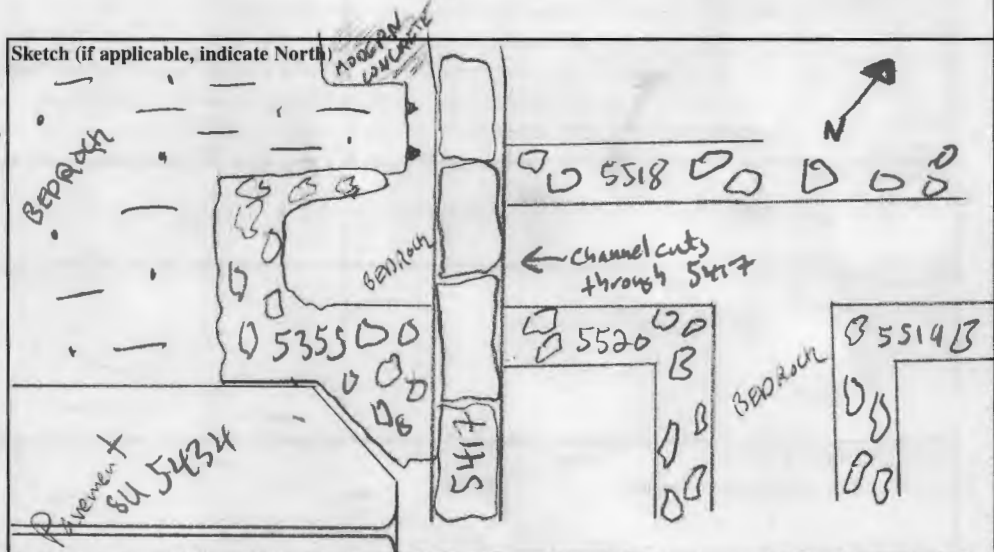

Floor type: Beaten Earth Opus signinum Opus scutulatum Opus Sectile Mosaic Opus spicatum Other (specify)

Wall finishing Stucco Opus signinum Plaster Painted Plaster Other (specify)

Approx. length, width, height of structural remains:

Description: *Mortared Rubble wall with pieces of tufo, basalt, travertine & tile. Sits directly on bedrock. Feature forms three sides of a channel which then cuts through ashlar wall 5417 to the east. Gap in northern wall where it meets 5417.*

Sketch (if applicable, indicate North)

INTERPRETATION

SU 5355 is the wall of a drainage channel formed also by 5518, 5519, 5520 on the other, eastern, side of 5417. The channel cuts through this ashlar wall, which must have been out of use when it was constructed. The gap in the north leads to a square cut in the bedrock, now filled with modern concrete, possibly also associated with water movement. This then joins the cut (SU 5418) for 5417 - if water drained through here, 5417 must certainly have been out of use.

SOIL SAMPLING: Yes No

Total volume of layer (buckets):

Sample quantity (buckets):

Sample fraction (%):

NON SOIL SAMPLES: Yes No

If yes, specify (e.g. charcoal, mortar etc.):

Size:

SIEVING: Yes No
