Sketch for the position of the skeleton
 (was drawn from memory and assumption)

INTERPRETATION

- human skeleton (remains of a mandible)
- during excavation only fragments of the skull were visible
- when we excavated those, all longbones appeared beneath the skull, so as if the child was buried in a crouching position.
- all the soil around the skeleton was sieved, but the jar could not be found, only one little fragment.

- in addition we did not find any teeth
- a few finger or toe-bones were remarkably well preserved
